ABOUT ME

I am a highly experienced frontend developer with over 3 years of professional experience. I specialize in creating user-friendly and visually appealing websites and applications, utilizing the latest technologies and trends in the industry. I am always looking to expand my skill set and take on new challenges, which is why I am currently seeking a new job. With my strong technical abilities and keen attention to detail, I am confident in my ability to deliver top-quality results for any project

WORK EXPERIENCE

REACT-DEV(PRICE-FX)

NOVEMBER 2019 - NOW

PRICEFX

Description :SaaS Based Pricing Software Company

Main Technologies:

- +React hooks
- +React-state-management : React-context-API + reducer , redux , recoil
- +Type system : Typescript
- +Unit-test : Jest , React-testing-libraries , enzyme
- +Design-system : Ant Design
- +UI-component-doc : Story-book
- +CSS : SASS
- +Style-coding : Functional-programming
- +Extra libraries : lodash-fp , axios , reselect , etc

Role:Software engineer -Product engineer team

Main responsibilities:

- Writting code based on high-level-architecture (based on what have been implemented) and combine them together , make it fast to develop a new feature
- Discuss and implement a new feature based on our daily meeting with senior devs from over-seas and product-owner
- Improve our codebase by applying best practice and avoid unnessary render

Recognition and Gains:

- Working with a pretty large project (30 devs for front-end only) helps me to understand the concept of breaking down the huge problems into smaller and smaller
- Understanding our coding styles and applies best practice to reduce the amount of bugs and boiler plate codes
- Having fun working with oversea-dev team and great relationship with everyone within our international company

JAVA-DEV (KATALON STUDIO)

OCTOBER 2018 - MARCH 2019

KMS TECHNOLOGY

Description :Katalon Studio is a free automation testing solution developed by Katalon team. The software is built on top of open-source automation frameworks Selenium, Appium with a specialized IDE interface for API, Web and Mobile testing

Main responsibilities:

- Reviewing current requirements from the users
- Working closely with analysts, designers and staff
- Producing detailed specifications and writing the program codes
- Testing the product in controlled, real situations before going live

Recognition and Gains:

- During my stay there at KMS , I learn many skills from senior programmers and find the external way to boost my current skills including:
- Strong communication
- Ability to work in a team
- Eye for detail and identifying problems
- An understanding of business

EDUCATION

MELBOURNE UNIVERSITY

2014 - 2017

MAJOR: SOFTWARE ENGINEER

GPA: 3.2/4

FINAL PROJECT

MY PORFOLIO
